[754] [822] their baleful influence. Similarly, some men are supposed to possess "evil shadows," so much so, that even if snakes fall within their ambit, they cannot move an inch. When a child vomits, has [753] bowel complaints or fever, or cries unnecessarily, it is the evil eye that is thought to be responsible for [822] the malady. Let a man's evil shadow fall on rice-[273] beer, lo and behold! it does no more ferment.

[789] [754] To prevent these, Santal children are made to wear amulets of parasites on *Bhela* trees. Incantations are also uttered over some mustard seeds, a few grains of which are wrapped up in a piece of cloth and worn as a charm held by a string round the loins or the neck. In serious cases, the *Ojha* [756] (exorcist) is summoned when he chants incantations and removes the spell.

Magical charms to counteract spells are learnt by many Santals, for, who knows that 'evil eyes' may not lead them to embarrassing situations at village dances, when they may find their wearing cloth being stolen away by invisible hands? And [756] in ceremonies like marriages, the services of an exorcist are sometimes requisitioned to patrol over women with evil eyes or men with evil shadows.

Apart from these, there are various other beliefs regarding the capacity of certain men to cast magical [578] spells. Thus if an inimical person buries anything near a Santal's house, it is thought that an injury is intended.

St Culshaw M-S (1932-1943) 1949 AW42 Santal AW42

in the dung heap. Another Soren sub-clan is known briefly as the Sidup' Soren, and the name is connected with a custom followed when they are making their sub-clan sacrifice. The man squats on the ground in the courtyard of the house holding before him a sheaf of paddy. Meanwhile his wife squats nearby with her back to her husband. He passes the sheaf over his head to his wife, who receives it with her hands lifted above her head and takes it into the house. She may not perform this service if she has formerly been the wife of another man and is either a widow or has been divorced. The women of this sub-clan cannot wear a *campa*[1] flower in their hair.

There are two stories current concerning the origin of the Cilbinda Hāsdāk', or the Hāsdāk' who killed a kite. One of them states: "In the days of the early ancestors many very wonderful things used to happen. At that time kites were causing a great deal of trouble throughout the countryside. Every day they used to snatch away not only men's chickens but also the grown fowl, and in addition they used to take kids, young pigs and children. In this way they were the cause of much sorrow to men. Seeing this state of affairs, one of the Hāsdāk' brothers who was working out in the fields hid behind his clod-crusher and shot a kite through the hole in the middle, and from that time his family got the name." An even more suggestive version is more widely known. An old man belonging to this sub-clan told the story thus: "Formerly our ancestors fell into great difficulties. They were engaged in transplanting rice seedlings and had plucked them from the seedling beds, but there was no rain and so they could not proceed with the transplanting. Now, there was a kite perched in a tree adjoining the field. They shot it, and the blood moistened the land so that they were able to carry on with their work."

The claim to belong to the original sub-clan is made by many people belonging to various other divisions. Binu of Tantidanga made this claim for the sub-clan to which he belonged. He was a Jihu Hāsdāk' and he used to say: "They were the first of the lot." The name is derived from the fact that while their ancestors were hunting in the Khandarae forest they ate the flesh of the *jihu*[2] bird. Since that time they will never eat it, nor will they touch anything that is deep blue in colour, lest people say that they are touching the blue eggs of the jihu bird.

[1] *Ochna squarrosa*, L.

[2] There are two kinds of birds so named. The *Ilkunda jihu* is the Bengal Babbler, *Malacocercus terricolor*, and the *Janum jihu* is the green Babbler, *Chalcoriuus striatus*.
